

Google Maps

Google Maps is a free app that helps you find addresses, shops, and services, and get directions to reach them, on foot, by car, or by public transport. It is one of the most useful apps for getting around safely and confidently in your everyday life.

Google Maps.

Finding Your Current Location.

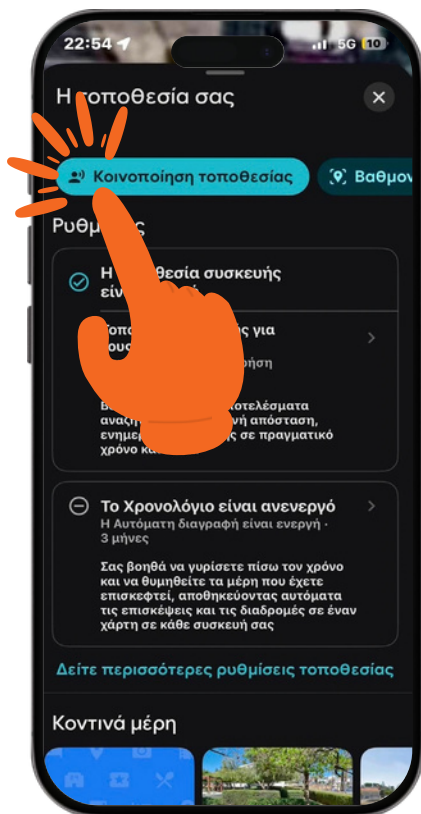

1. Find the blue dot

Zoom in on the blue dot and tap it to see where you are.

2. Tap “Share location”

If you want to send your location to someone, tap the “Share location” button.

Finding Your Current Location.

3. Choose a recipient

Tap one of the names under “Suggestions”, or tap “More options” to choose where to send your location.

4. Choose a recipient or an app

If you tapped “More options”, you can either choose a person from the quick options, or choose the app you want to use to send your location.
