

Google Chrome.

Google Chrome is the browser usually used on Android devices, although it can also be downloaded on an iPhone. It works in a similar way to Safari: it lets you search the internet, open websites, and save them so you can easily find them again later.

How to open Google Chrome.

1. Find Google Chrome

Swipe through the Home Screen to find Google Chrome.

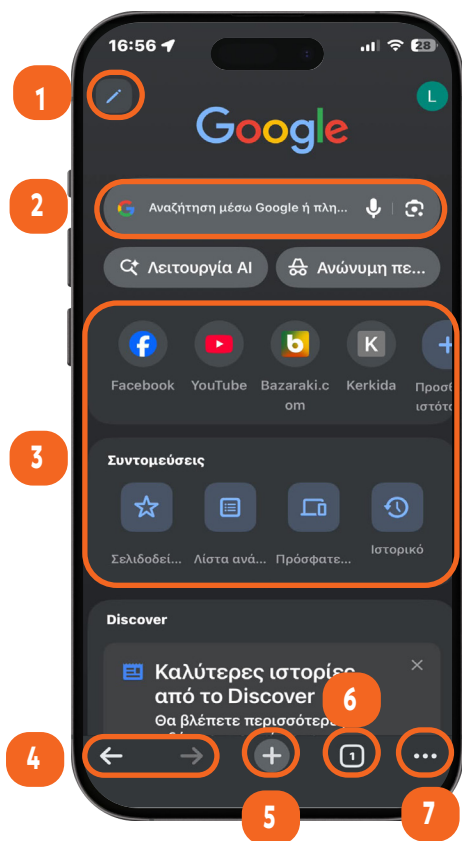

2. Open the app

Tap the Google Chrome app icon.

Google Chrome.

Basic features of the Google Chrome home screen.

1. Edit button

Lets you customise the Chrome Home Page.

2. Search bar

Lets you type a word to search the internet.

3. Shortcuts

Quick access to frequently visited websites, bookmarks, downloads, Reading List, and history.

4. Arrows (<, >)

One arrow takes you back to the previous page, and the other takes you forward to the next page.

5. Plus symbol (+)

Creates a new tab.

6. Tabs

Shows all the tabs currently open.

7. Three dots (...)

Opens a menu with additional options.

Editing the Google Chrome home screen.

Tapping the Edit button opens the “Customise Home Page” menu, where you can choose a background for your Home Page.

If you swipe up, you can turn on or off which items appear on the Home Page.
