Different browsers.

A browser is the app you use to go onto the internet and view websites. On iPhones, Safari is usually used, while Google Chrome is also available. Using a browser, you can search for anything that interests you, read news, view maps, watch videos, or shop online. It is like a gateway that takes you anywhere on the internet through your mobile phone.

Safari.

Safari is the browser that comes pre-installed on every iPhone. It lets you browse the internet, search for information, and visit websites without needing to download anything extra.

How to open Safari.

1. Find Safari

Swipe through the Home Screen to find Safari.

2. Open the app

Tap the Safari app icon.

Safari.

Basic features of the Safari home screen.

1. Favourites

Websites you visit often, available with one tap.

2. Suggestions

Websites that Safari suggests automatically.

3. Edit

Lets you change or remove items from the list.

4. Back arrow (<)

Takes you back to the previous page.

5. Search

Lets you type a word or website address.

6. Three dots (...)

Opens a menu with additional options.

7. Privacy Report

Shows how many trackers Safari has blocked.

Editing the Safari home screen.

Turn on or off the items you want to appear on the Start Page, such as Favourites, Suggestions, and Privacy Report.

If you swipe up, you can choose or change the background image of the Start Page.
