

Google Chrome.

Google Chrome is the browser usually used on Android devices, although it can also be downloaded on an iPhone. It works in a similar way to Safari: it lets you search the internet, open websites, and save them so you can easily find them again later.

Google Chrome.

Tabs in Google Chrome.

A tab is a separate page inside Google Chrome. Each time you open a new website in a tab, you can leave it open and return to it whenever you want, without losing the page you were viewing before.

How to create a new tab.

1. Tap “+”

Tap the “+” at the bottom of the Google Chrome screen.

2. View the new tab

The new tab opens on your screen, and you can type the address or word you want to search for.
