video on our website:

Different browsers.

A browser is the app you use to go onto the internet and view websites. On iPhones, Safari is usually used, while Google Chrome is also available. Using a browser, you can search for anything that interests you, read news, view maps, watch videos, or shop online. It is like a gateway that takes you anywhere on the internet through your mobile phone.

Safari.

Safari is the browser that comes pre-installed on every iPhone. It lets you browse the internet, search for information, and visit websites without needing to download anything extra.

Safari.

Voice search in Safari.

Voice search is the ability to search for something on the internet by speaking to your phone instead of typing. Tap the microphone icon, say clearly what you want to find, and your phone will show the results of your search.

How to use voice search.

1. Find Safari

Swipe through the Home Screen to find Safari.

2. Open the app

Tap the Safari app icon.

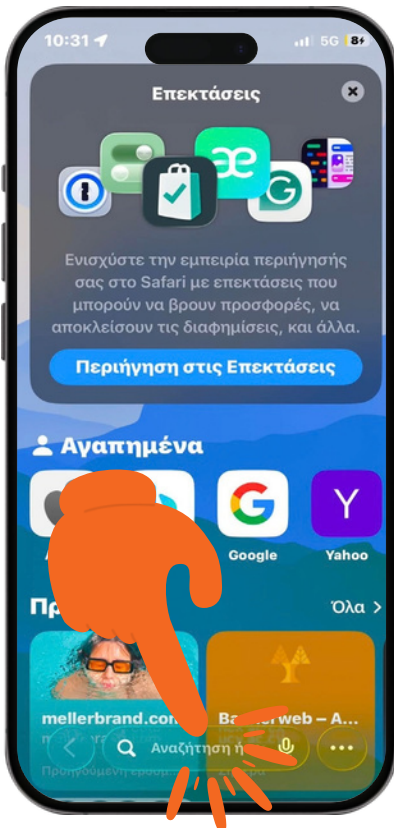

Safari.

How to use voice search.

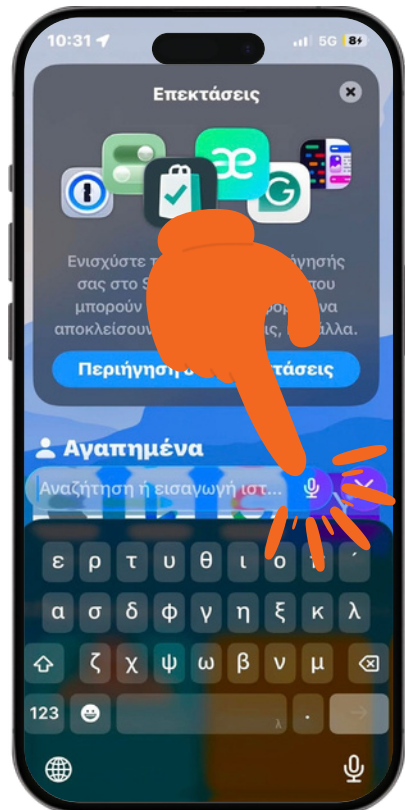

3. Tap the search bar

Tap the search bar at the bottom of the screen.

4. Tap the microphone

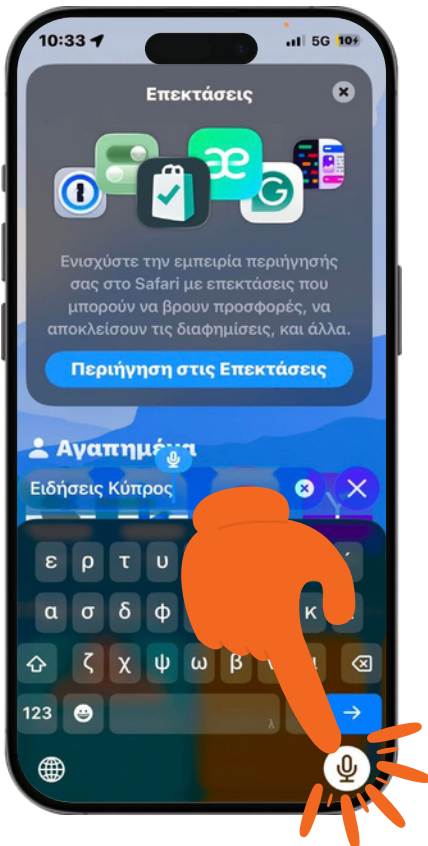

Tap the microphone icon on the keyboard.

How to use voice search.

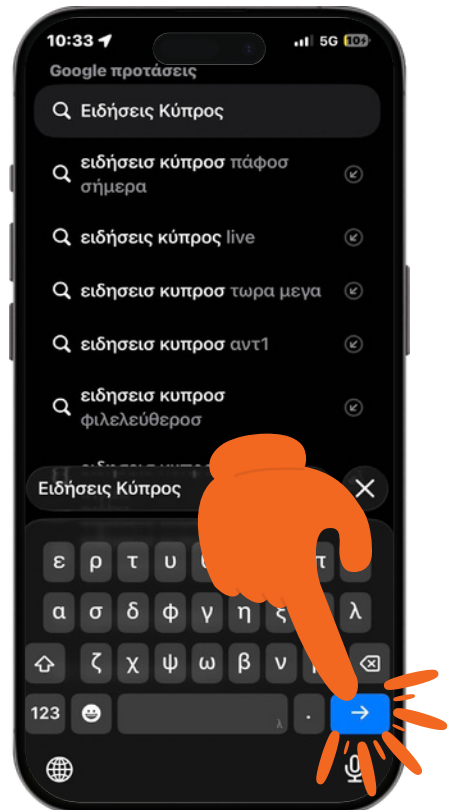

5. Say what you want to search for

Clearly say what you want to search for. When you are finished, tap the microphone again.

6. Tap the search arrow

Tap the search arrow on the keyboard to start the search.

Safari.
