video on our website:

Different browsers.

A browser is the app you use to go onto the internet and view websites. On iPhones, Safari is usually used, while Google Chrome is also available. Using a browser, you can search for anything that interests you, read news, view maps, watch videos, or shop online. It is like a gateway that takes you anywhere on the internet through your mobile phone.

Safari.

Safari is the browser that comes pre-installed on every iPhone. It lets you browse the internet, search for information, and visit websites without needing to download anything extra.

Safari.

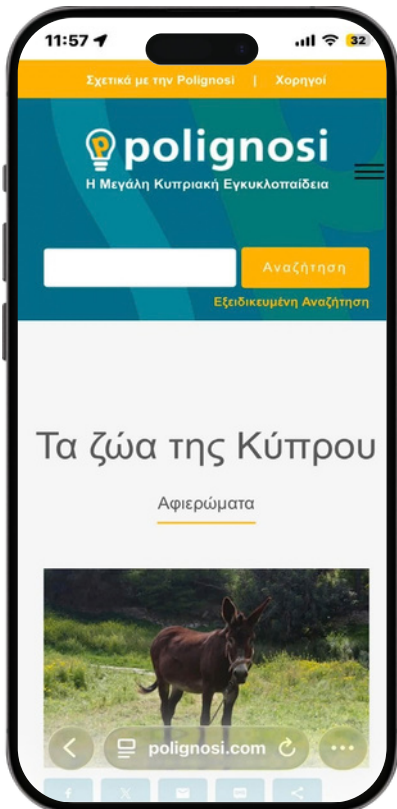

Sharing a page.

Sharing a page means you can send a website to someone else, for example through a message, email, or communication app.

How to share a page.

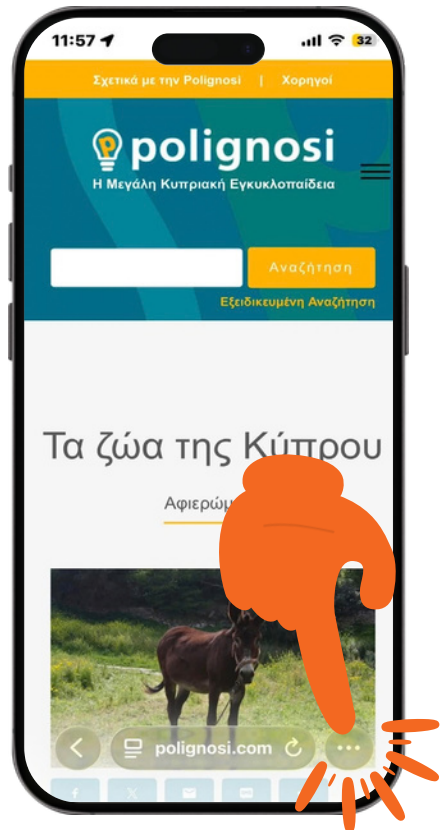

1. Open the page you want

Go to the website you want to share.

2. Tap the three dots

Tap the three dots (...) at the bottom of the Safari screen.

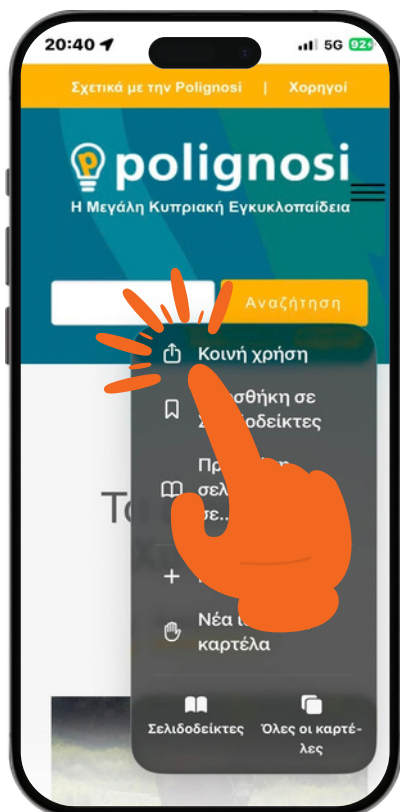

Safari.

How to share a page.

3. Tap “Share”

From the menu that opens, tap “Share”.

4. Choose how to send it

Choose, for example, “Messages”, then choose the person you want to send the page to.
