video on our website:

Different browsers.

A browser is the app you use to go onto the internet and view websites. On iPhones, Safari is usually used, while Google Chrome is also available. Using a browser, you can search for anything that interests you, read news, view maps, watch videos, or shop online. It is like a gateway that takes you anywhere on the internet through your mobile phone.

Safari.

Safari is the browser that comes pre-installed on every iPhone. It lets you browse the internet, search for information, and visit websites without needing to download anything extra.

Safari.

Tabs in Safari.

A tab is a separate page inside Safari. Each time you open a new website in a tab, you can leave it open and return to it whenever you want, without losing the page you were viewing before.

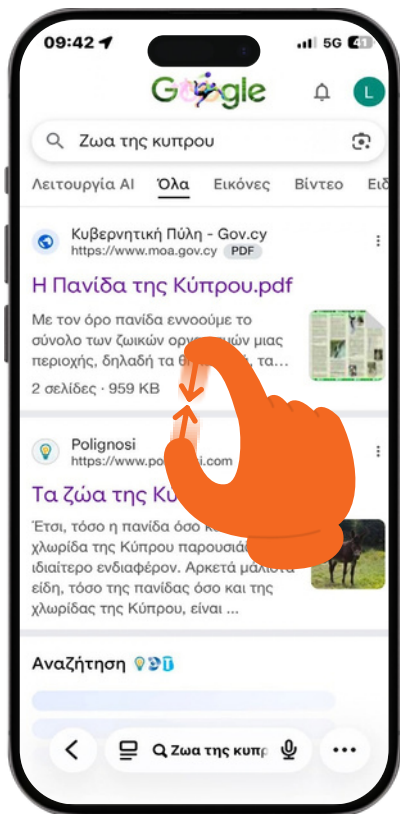

Safari.

How to create a new tab.

Option 1

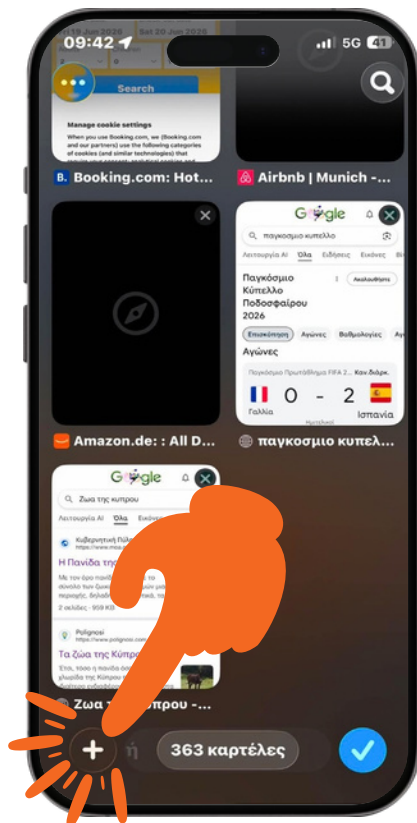

1. Zoom out

Use the zoom-out gesture on the Safari screen to see all your open tabs together.

2. Tap “+”

Tap the “+” button to open a new, blank tab.

How to create a new tab.

Option 1

3. View the new tab

The new tab opens on your screen, and you can type what you want to search for.
