

Google Chrome.

Google Chrome is the browser usually used on Android devices, although it can also be downloaded on an iPhone. It works in a similar way to Safari: it lets you search the internet, open websites, and save them so you can easily find them again later.

Tabs in Google Chrome.

A tab is a separate page inside Google Chrome. Each time you open a new website in a tab, you can leave it open and return to it whenever you want, without losing the page you were viewing before.

How to view all your tabs.

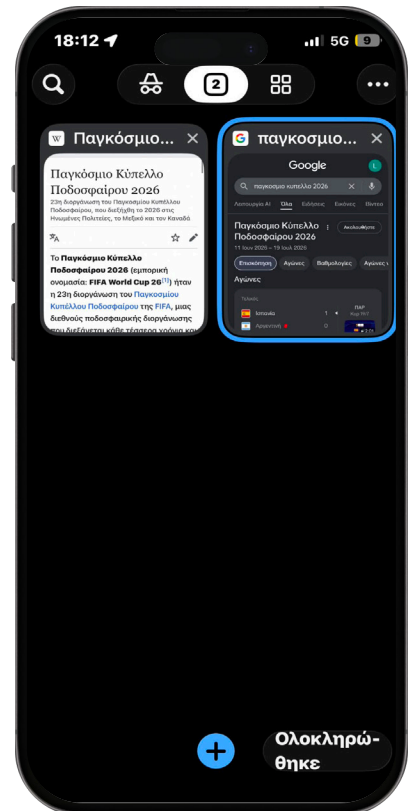

1. Tap the tabs icon

Tap the tabs icon at the bottom of the Google Chrome screen.

2. View all your tabs

You can see them all by swiping up or down in the list of tabs.

Google Chrome.

How to view all your tabs.

3. Open a tab

If you want to view a particular tab, tap it to open it.

4. View the selected tab

The tab you selected now opens on your screen, and you can continue browsing in it.
