

Google Chrome.

Google Chrome is the browser usually used on Android devices, although it can also be downloaded on an iPhone. It works in a similar way to Safari: it lets you search the internet, open websites, and save them so you can easily find them again later.

Google Chrome.

Voice search in Google Chrome.

Voice search is the ability to search for something on the internet by speaking to your phone instead of typing. Tap the microphone icon, say clearly what you want to find, and your phone will show the results of your search.

Google Chrome.

How to use voice search.

1. Find Google Chrome

Swipe through the Home Screen to find Google Chrome.

2. Open the app

Tap the Google Chrome app icon.

Google Chrome.

How to use voice search.

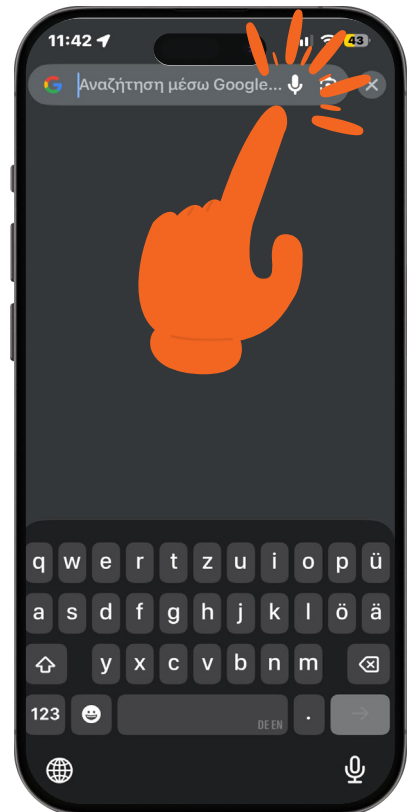

3. Tap the search bar

Tap the search bar at the top of the screen.

4. Tap the microphone

Tap the microphone icon on the keyboard.

How to use voice search.

5. Say what you want to search for

Clearly say what you want to search for. When you are finished, pause briefly.

6. View the results

Your search results will appear on the screen.
