

# Home Screen.

This is the first screen you see after unlocking your phone. It has your app icons, your most important apps at the bottom, and a search button.

**Apps**  
Each icon  
is an app.

**Search  
button**

**Favourite  
apps**

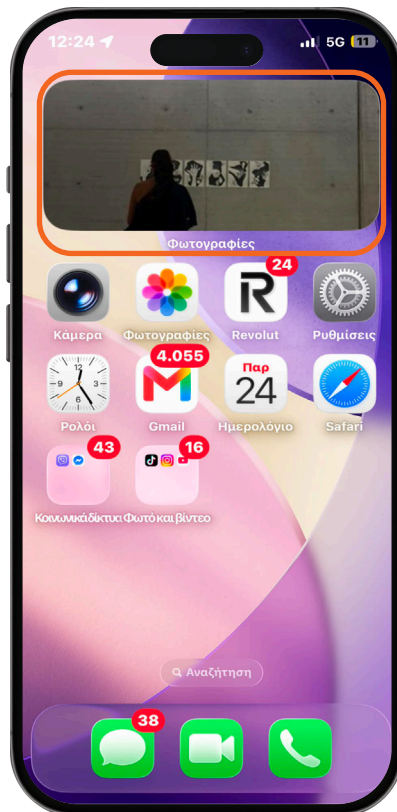

**Folders  
containing  
groups of apps**  
Several icons  
together in  
one box form a  
folder, making  
them easier to  
organise.

Home Screen.

## Widgets.

Small windows on the Home Screen that show information at a glance, such as the weather or date, without opening the app.

## How to add a widget.

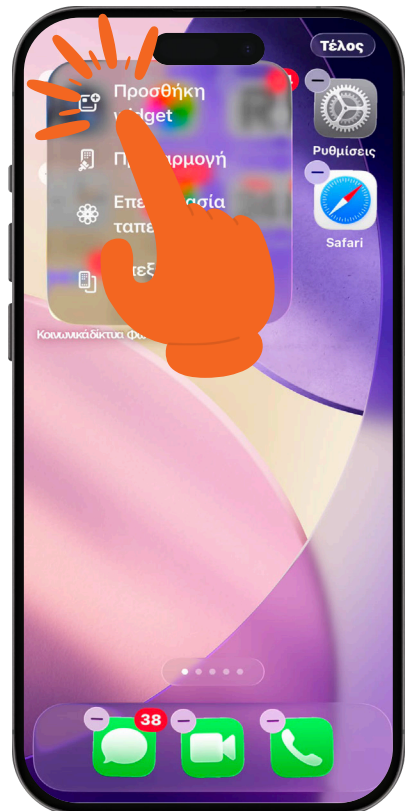

### 1. Long press an empty area

Long press an empty area on the Home Screen until the “Edit” button appears in the top-right corner, then tap it.

### 2. Choose “Add Widget”

From the list that appears, select “Add Widget”.

Home Screen.

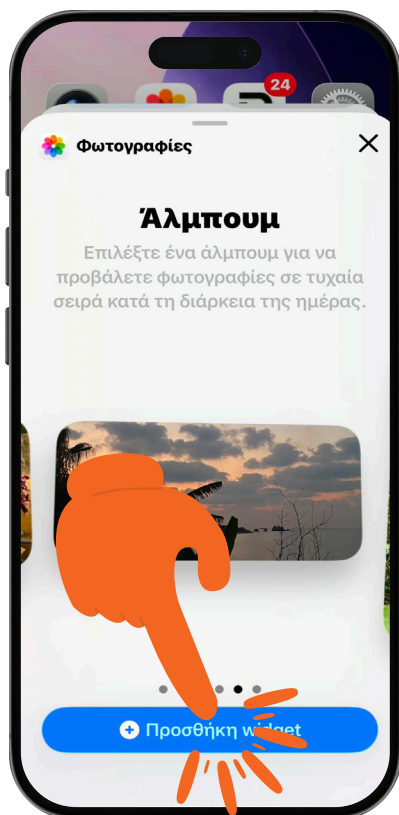

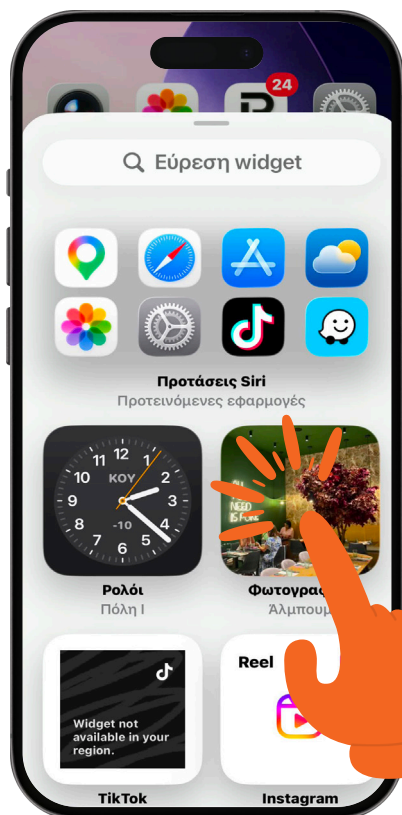

## How to add a widget.

### 3. Choose the widget you want

From the new window showing widget options, choose the one you want by tapping it.

### 4. Select a size and add it

You can choose the widget size by swiping left and right. When you are ready, tap the blue “Add Widget” button.

## How to add a widget.

### 5. Tap “Done”

Tap anywhere on an empty area of the screen, or tap the “Done” button in the top-left corner, to finish.
