

Phone / Contacts / Messages.

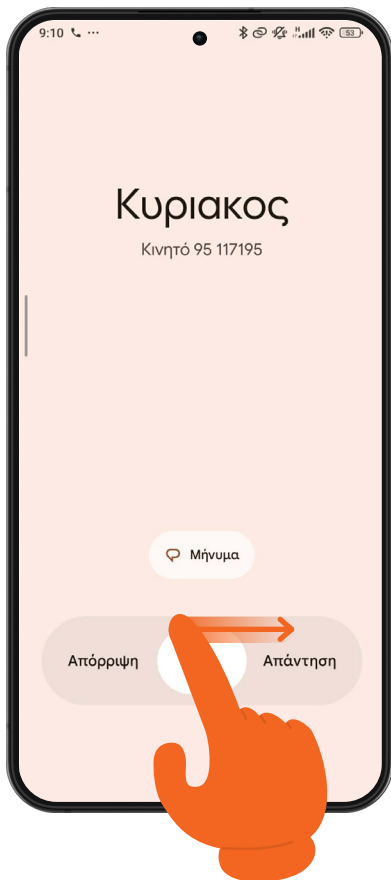

Phone, Contacts, and Messages are three of the most basic apps on your phone. They allow you to call, save numbers, and send text messages (SMS). They always work, even when you don't have an internet connection, as long as you have signal from your mobile carrier. The three apps are connected to each other, so you never need to remember numbers by heart.

How to answer a call.

Accept the call

When the phone rings, swipe right to answer, or tap the green button with the phone, depending on your device.

Decline the call

If you don't want to answer, swipe left to decline the call, or tap the red button, depending on your device.
