

Phone / Contacts / Messages.

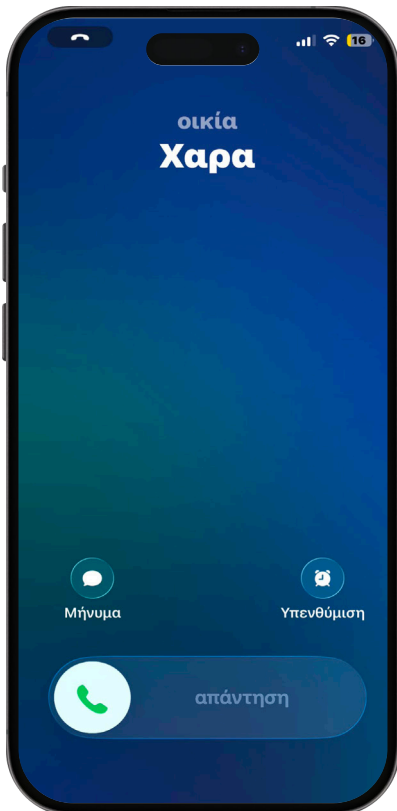

Phone, Contacts, and Messages are three of the most basic apps on your mobile phone. They allow you to make calls, save numbers, and send text messages (SMS). They work even when you do not have an internet connection, as long as you have signal from your mobile network provider. The three apps are connected, so you never need to remember phone numbers by heart.

How to answer a call.

Accept the call

When the phone rings, either tap the green answer button, or swipe it in the correct direction, depending on your device.

Decline the call

If you do not want to answer, tap the red button to decline the call.
