

Phone / Contacts / Messages.

Phone, Contacts, and Messages are three of the most basic apps on your mobile phone. They allow you to make calls, save numbers, and send text messages (SMS). They work even when you do not have an internet connection, as long as you have signal from your mobile network provider. The three apps are connected, so you never need to remember phone numbers by heart.

How to save a new contact.

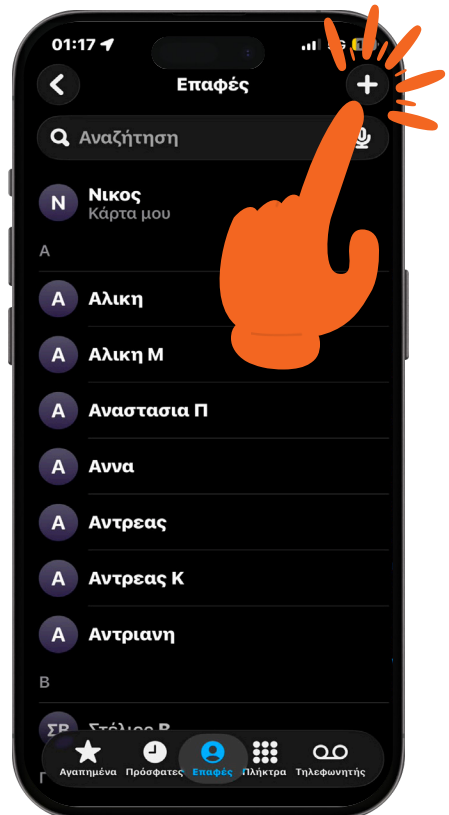

1. Open Contacts

Open the “Phone” app and tap “Contacts”.

2. Create a new contact

Tap “+” to create a new contact.

3. Fill in the details

Tap “First Name” and “Last Name” and fill them in, then tap the green button next to “Add Phone” and enter the number.

4. Save

When you have finished entering the details, tap the blue tick in the top-right corner to save the contact.
