

Home Screen.

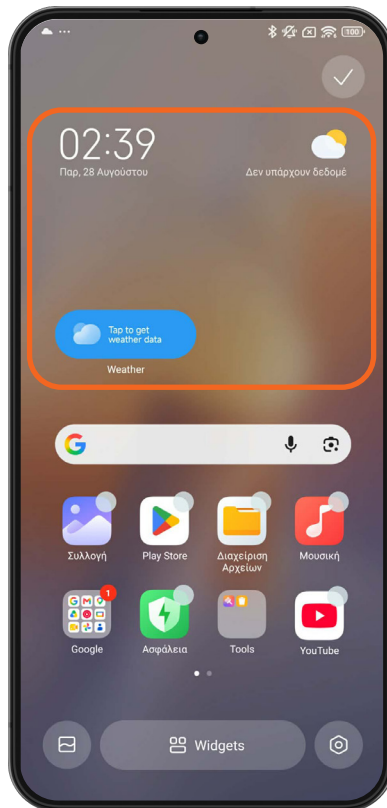

This is the first screen you see after unlocking, with your app icons, with the most important apps placed at the bottom, as well as a search button.

Home Screen.

Widgets.

Small windows on the home screen that show information at a glance, such as the weather or the date, without opening the app.

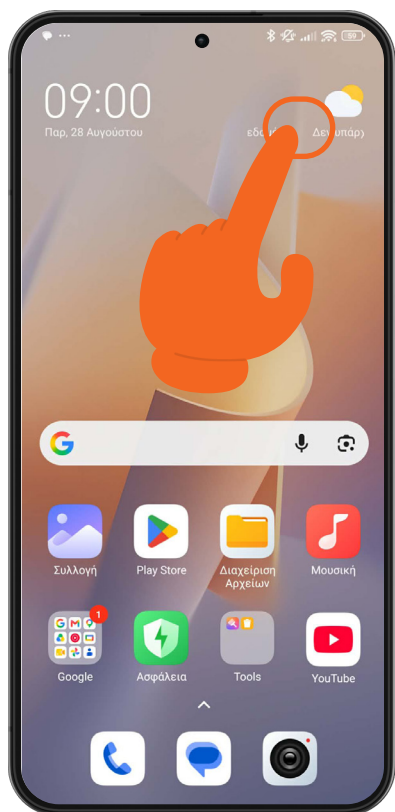

Home Screen.

How to remove a widget.

1. Long-press the widget

Press and hold on the widget you want to remove.

2. Move it to the top

While holding it, move it to the top of the screen and release it once you bring it over the “X” icon. You will see the widget change color, which means it is over the trash can and will be removed.
