

Camera & Photos.

Camera and Gallery (or Collection) are two basic apps on your phone. They allow you to take photos and videos, and view them later, safely stored on your device. They always work, even when you don't have an internet connection or mobile signal. The two apps are connected to each other, so every photo you take is automatically saved to your Gallery.

Taking a photo.

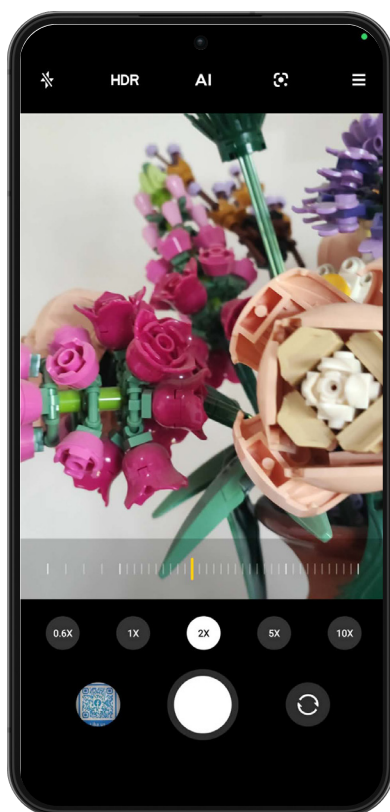

1. Open the Camera app

Find and open the Camera app on your device.

2. Aim at your subject

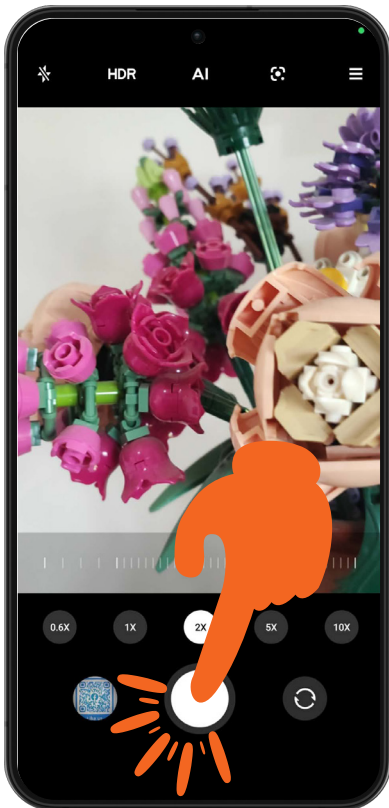

Point the camera at the person or object you want to photograph.

Taking a photo.

3. Press the shutter button

Press the white round button to take the photo.

4. View the photo

Tap on the circle at the bottom left to view your photo.
