

Camera & Photos.

Camera and Photos are two basic mobile phone apps. They allow you to take photos and videos and view them later, safely stored on your device. They work even when you do not have an internet connection or mobile signal. The two apps are connected, so every photo you take is automatically saved in your Photos app.

Taking a photo.

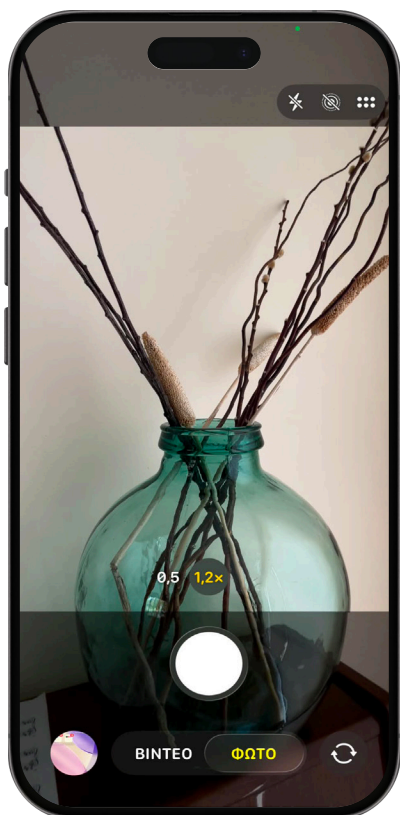

1. Open the Camera app

Find and open the Camera app on your device.

2. Aim at your subject

Point the camera at the person or object you want to photograph.

Taking a photo.

3. Tap the shutter button

Tap the white circular button to take the photo.

4. View the photo

Tap the circle in the bottom-left corner to view your photo.
