

Home Screen.

This is the first screen you see after unlocking, with your app icons, with the most important apps placed at the bottom, as well as a search button.

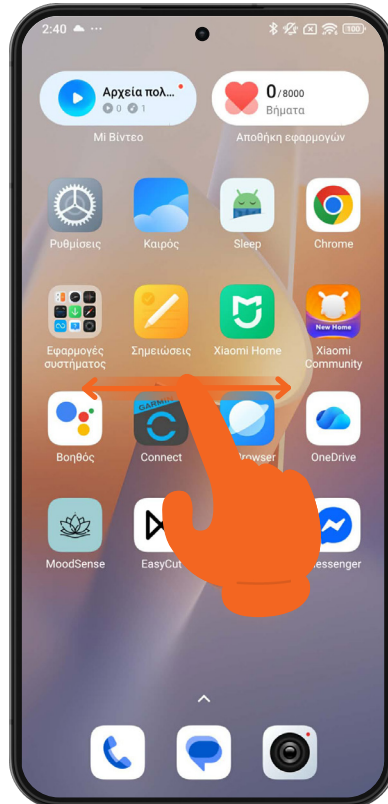

How to move around the Home Screen.

Your apps don't always fit on a single screen. There are usually multiple pages.

Change page

Swipe your finger to the left to see a page with more icons, or to the right to return to the previous one.

Home Screen.

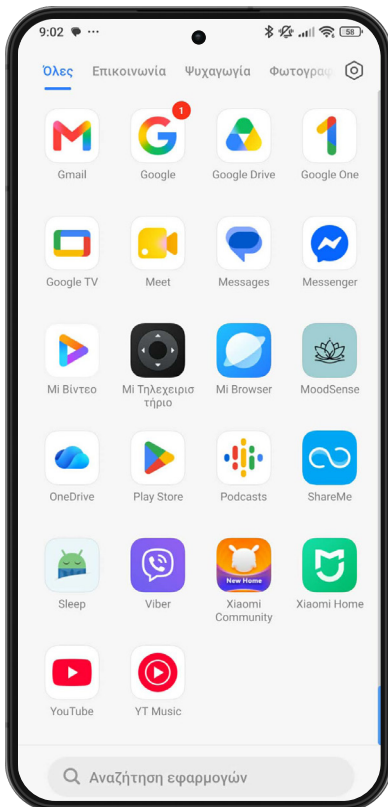

How to move around the Home Screen.

Go directly to the first page

Quickly swipe your finger from the bottom of the screen upward, without stopping halfway. This will take you immediately to the first page, wherever you are. Press the Home button, if your device has a physical one.

How to move around the Home Screen.

See all your apps together

Swipe your finger upward (swipe up) on any page of the home screen. You will find a list with all your apps organized into categories.
