

Basic settings.

Settings is the app where you adjust your mobile phone to suit your own needs.

How to open the Settings app

On your Home Screen, look for a grey icon with a gear (a small wheel with teeth). This is the Settings app. Tap it once to open it.

Basic settings.

Quick settings panel.

In addition to the Settings app, there is a quicker way to change the settings you use most often, without needing to open any app.

Open Quick Settings

Swipe down from the top-right corner of the screen to open the Quick Settings panel.

Basic settings.

Quick settings panel.

Screen brightness

Swipe up for a brighter screen (useful outdoors, in the sun) or down for a dimmer screen (useful at night, and saves battery).

Volume

Swipe up for louder sound or down for quieter sound. It controls the sound for calls, videos, and notifications.

Camera

This opens the Camera app immediately, without needing to look for its icon.

Quick settings panel.

Airplane Mode

This temporarily turns off all connections: calls, messages, Wi-Fi, and mobile data. It is usually used on an aeroplane when requested.

Wi-Fi

This turns the connection to a wireless internet network on or off, whether you are at home or elsewhere.

Silent Mode

This silences call and message sounds without deleting them.

Flashlight

This turns on the camera flash as a flashlight so you can have light.
