

Keyboard.

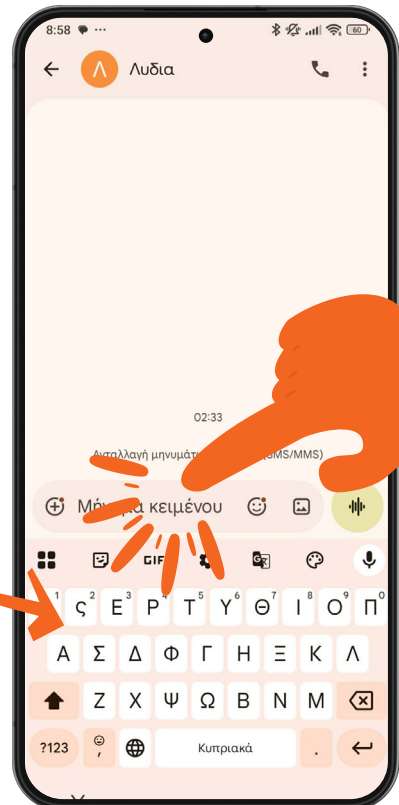

Almost every app will require you to type something, e.g., a message, a search, a code. Let's see how your phone's keyboard works.

How the keyboard appears

The keyboard appears automatically at the bottom of the screen whenever you tap on a text field.

How to type

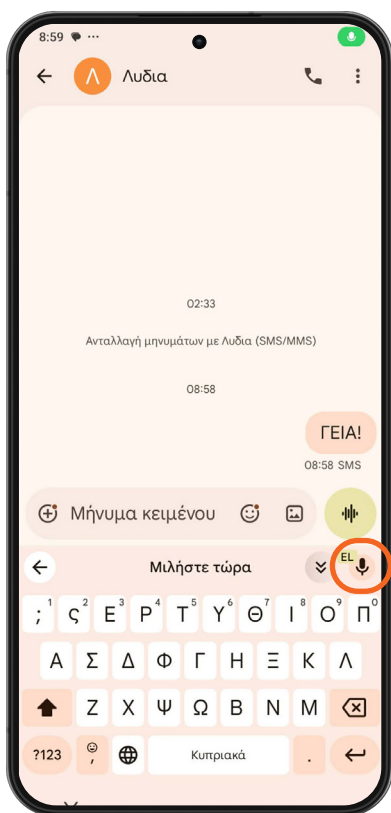

Tap on the letter you want on the screen. Each tap adds a letter where you're typing, until you form your word.

Keyboard.

Voice typing.

If you find it difficult to type, you can speak and your phone will write what you say.

1. Start voice typing

Tap the microphone icon on the keyboard (usually bottom right or next to the space key) and speak clearly. The text will appear on the screen as you speak.

2. Stop voice typing

Tap the microphone again, or anywhere on the screen, when you're finished.
