

Keyboard.

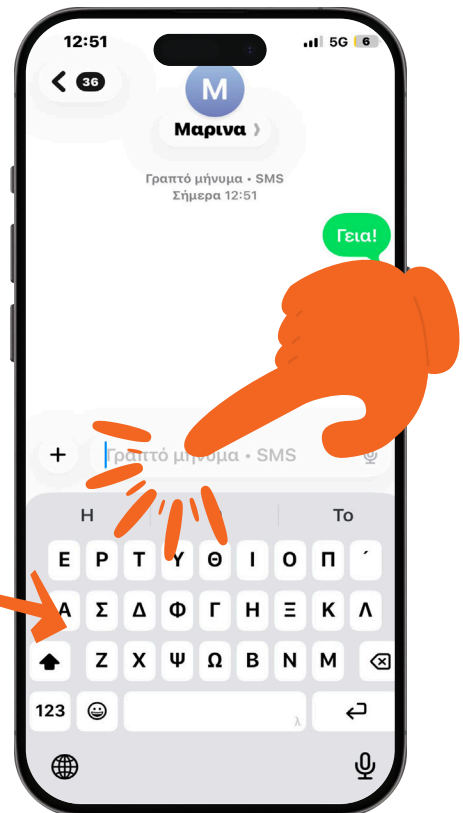

In almost every app, you will need to type something, such as a message, a search, or a password. Let us see how your phone keyboard works.

How the keyboard appears

The keyboard automatically appears at the bottom of the screen whenever you tap a text field.

How to type

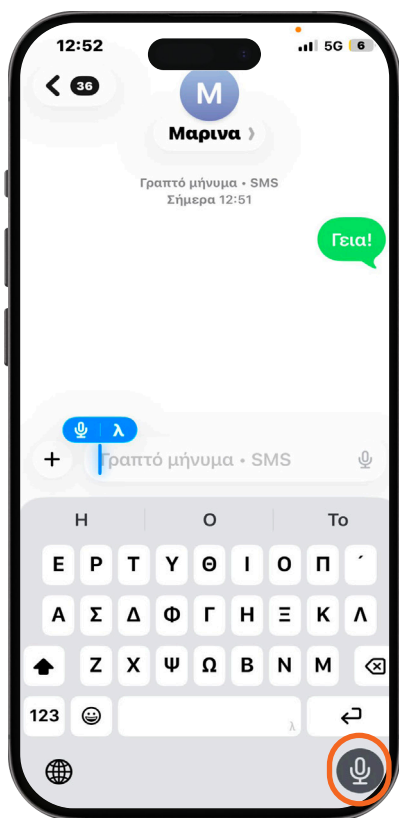

Tap the letter you want on the screen. Each tap adds a letter where you are typing until you form your word.

Keyboard.

Voice typing.

If you find it difficult to type, you can speak and the mobile phone will write what you say.

1. Start voice typing

Tap the microphone icon on the keyboard (usually at the bottom-right or next to the space bar) and speak clearly; the text will appear on the screen as you speak.

2. Stop voice typing

Tap the microphone again, or tap anywhere on the screen, when you are finished.
