

Lock Screen.

The Lock Screen is the first screen you see whenever you turn on your mobile phone, before you enter it. It shows you the most important information at a glance, without needing to unlock your phone.

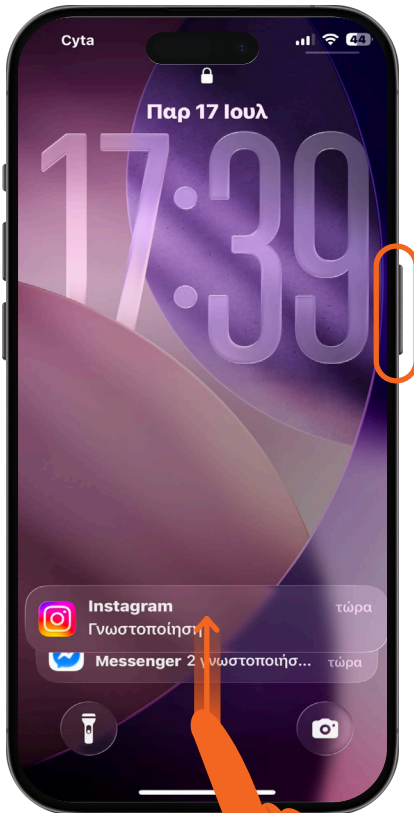

Lock Screen.

How to unlock your phone.

1. Turn on the screen

Press the side button (the power button) briefly to turn on the screen.

2. Unlock the phone

To unlock the phone, swipe up starting from the small white line at the bottom of the screen. If your device has a button with a fingerprint symbol, place your finger on it.

3. Confirm your identity

If a number keypad appears, enter your personal pass-code: the code you chose when you first set up the phone, or the one given to you by the person who helped you set it up.
